

Artur Grigoryan

Full Stack Software Engineer

Cologne, Germany · hi@artur-grigoryan.dev · www.artur-grigoryan.dev

PROFESSIONAL SUMMARY

Frontend-leaning full-stack engineer building for the web since 2016, and at Electronic Arts since 2022. Strongest with React, Next.js and TypeScript, comfortable across the whole stack from headless-CMS APIs to accessible, polished UI. Over the past year: deep in agentic coding (Cursor & Claude), with a heavy code-review load, interviewing & hiring, and acting as an informal technical lead.

EXPERIENCE

Full Stack Software Engineer, Electronic Arts Apr 2022 – Present

- Work in a cross-functional product squad (engineering, product, delivery & UX).
- Frontend: web apps & platforms with React 19, Next.js & React Aria (a11y).
- Shipped a mobile game — a Sensible Soccer remake — built in Godot.
- Data layer: TanStack Query, realtime data and a typed BFF.
- APIs & headless CMS across Strapi, Sanity, Payload & FastAPI.
- Quality: Jest + Testing Library, Cypress, MSW, Storybook & visual regression.
- A year deep in agentic coding with Cursor & Claude — subagents, rules & reusable skills.
- Heavy code-review load; interviewing & hiring; informal technical lead.

Full Stack Software Developer, Fleetpool GmbH Feb 2020 – Dec 2022

- Full-stack web dev in a ~20-person team; planned site structures, backend & frontend.

Full Stack Software Developer, IMAGINE virtual services GmbH Dec 2016 – Dec 2022

- 3-person team; TYPO3 websites & extensions, backend development in PHP.
- Designing & managing database structures; WordPress sites.
- Frontend design implementation; content, domain & project management.

Student Assistant — School Support, NetCologne Telekommunikation mbH Dec 2010 – Dec 2016

- 1st-level support; Linux server & Windows client administration.
- Network administration (WAN, LAN, WLAN, VPN); training & support for schools.
